The UCMAS Programme (Universal Concept Mental Arithmetic System) is a modern representation of the ancestral art of mental arithmetic. This concept has its origin in China and its adaptation has given rise to a unique program that helps to stimulate children's brain activity.

The use of a specific methodology through abacus and particular didactic resources, generate an innovative and highly effective model that shapes the child in superior skills and abilities, thus improving their teaching-learning process.

UCMAS as a programme is focused on working more fully in which students develop arithmetic and cognitive skills and develop their capacities.
